MEMORANDUM FOR: Deputy Director for Support
SUBJECT : Office of Logistics Significant Accomplishments,
 Fiscal Year 1967

1. This memorandum is for your information only.
2. Attached is a brief report of significant accomplishments of the Office of Logistics (OL) during Fiscal Year 1967. In addition, we have continued to perform the routine and essential functions to fulfill the mission of the Office.

3. From a management point of view, three areas of activity are particularly worthy of note:

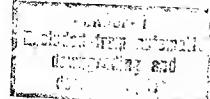

- a. The Planning Staff, OL, has been reoriented toward a continuing management review to insure that old methods and techniques are discarded and new ones instituted as appropriate. It is also reviewing, analyzing, and evaluating the OL operating plan and programs in order to relate funds, manpower, and other source requirements to Agency programs and objectives. This combines, at a single senior point, the firstline responsibility for budget planning and programming. Results of this new responsibility were of great value because this period saw a steadily increasing workload in OL, while at the same time our ceiling was reduced by 32 positions.
- b. The volume of worldwide construction activity continues to increase, requiring commitment of more Agency engineers to monitor major projects in widely separated areas of the world.
- c. We are showing steady improvement in Agency procurement controls, contracting procedures, and increased value per dollar expended. There has been a reduction in the number of contract actions resulting from greater use of other Government agencies' facilities such as MILSTRIP and FEDSTRIP.

Signed: George E. Meloon

George E. Meloon
 Director of Logistics
